

Avro

Sterile Eye Drops

Composition : Travoprost 0.04mg/ml.

Indications : It is indicated for the reduction of elevated intraocular pressure in patients with open-angle glaucoma.

Dosage and administration : Adults : One drop in the affected eye once daily in the evening. The dosage of travoprost should not exceed once daily since it has been shown that more frequent administration may decrease the normal intraocular pressure. Paediatric patients: The efficacy and safety of travoprost eye drops patients below the age of 18 years have not been established. Or as directed by the registered physician.

Side effects : The most frequently reported treatment-related side-effect is ocular hyperaemia.

Contraindication : Travoprost is contraindicated in patients with hypersensitive to Travoprost or any excipient of this preparation.

Use in pregnancy and lactation : Pregnancy category **C** by FDA.

Drug interaction : No specific interaction was observed with Travoprost eye drops.

Precautions : Travoprost should be used with caution in patients with active intraocular inflammation & macular edema. In case of patients with mild to severe hepatic impairment & renal impairment (creatinine clearance as low as 14 ml/min) no dosage adjustment is necessary. Travoprost should not be administered while wearing contact lenses. Lenses may be reinserted 15 minutes following administration of Travoprost eye drop.

Packing : 3ml in plastic dropper bottle.
